Miami, Florida 33199

Dear Dr. Hamid:

On May 14, 2015, the Florida Commission on Hurricane Loss Projection Methodology received your notification of errors discovered in the Florida Public Hurricane Loss Model version 5.0 submission. In accordance with the procedures for *Discovery of Differences in a Model after a Model has been Determined Acceptable by the Commission* in the 2013 Report of Activities, as Chair, I have reviewed, in consultation with a subset of the Professional Team, and have verified that the reported errors only impact the submission documentation.

The Commission accepts the corrections provided in the addendum to the previous Florida Public Hurricane Loss Model version 5.0 submission. As there was no reported impact on loss costs or probable maximum loss levels, a change in the model version identification is not required. The acceptability of the Florida Public Hurricane Loss Model version 5.0 continues and will expire on September 1, 2015, as originally determined by the Commission.

Sincerely,

Lori Medders, Chair

August 13, 2013

Dr. Shahid Hamid
Department of Finance
Florida International University
RB 208, College of Business
11200 SW 8 Street
Miami, Florida 33199

Dear Dr. Hamid:

This will confirm the finding of the Florida Commission on Hurricane Loss Projection Methodology on August 13, 2013, that the Florida Public Hurricane Loss Model has been determined acceptable for projecting hurricane loss costs and probable maximum loss levels for residential rate filings. The determination of acceptability expires on September 1, 2015.

The Commission has determined that the Florida Public Hurricane Loss Model Version 5.0 complies with the standards adopted by the Commission on October 19 & 20, 2011 and November 16, 2011, and concludes that the Florida Public Hurricane Loss Model Version 5.0 is sufficiently accurate and reliable for projecting hurricane loss costs and probable maximum loss levels for residential property in Florida.

On behalf of the Commission, I congratulate you and your colleagues. We appreciate your participation and input in this process.

Sincerely,

Lorilee Medders, Chair
