Dr. Shahid S. Hamid
Florida International University
International Hurricane Research Center, AHC 5
11200 SW 8 Street
Miami, Florida 33199

Dear Dr. Hamid:

This will confirm the finding of the Florida Commission on Hurricane Loss Projection Methodology on June 2, 2015, that the Florida International University computer model has been determined acceptable for projecting hurricane loss costs and probable maximum loss levels for residential rate filings. The determination of acceptability expires on November 1, 2017.

The Commission has determined that the Florida Public Hurricane Loss Model Version 6.1 limited to the options selected in the input form provided in Standard A-1 (Modeling Input Data) Disclosure 5 complies with the standards adopted by the Commission on September 24 & 25, 2013, and concludes that the Florida Public Hurricane Loss Model Version 6.1 limited to the Florida hurricane model options selected (Standard A-1 (Modeling Input Data) Disclosure 5) is sufficiently accurate and reliable for projecting hurricane loss costs and probable maximum loss levels for residential property in Florida.

On behalf of the Commission, I congratulate you and your colleagues. We appreciate your participation and input in this process.

Sincerely

Lori Medders, Chair
