

**Recommended Edits to the 4-27-15 Draft Statistical Flood Standards**  
Flood Standards Development Committee Meeting  
June 4, 2015

**SF-1, Flood Modeled Results and Goodness-of-Fit**

Disclosures

Professional Team: **Editorial**

Amendatory Language:

3. Provide the date of loss of the insurance company data ~~available~~used for validation and verification of the flood model.

**Form SF-4: Flood Validation Comparisons**

Professional Team: **Editorial**

Amendatory Language:

Rather than using ~~directly a~~-specific published flood extent and depths directly, the water height, the duration of the flood event (time needed for flood waters to recede), water flows including wave action, rate of water flow along banks and structures, and the weight, pressure and energy generated by moving water and its volume underlying the modeled flood loss cost calculations must be produced by the flood model being evaluated and should be the same flood parameters as used in completing Form AF-2, Flood Event Data Sources Statewide Losses.
