D. Pension Plan Total Fund and Asset Class Risk Monitoring

The SBA monitors investment risk relative to established risk and return objectives, leverage, intra-asset class allocations and individual portfolio limits. Risk Monitoring Standards are established for the Total Fund and each asset class. Active Risk Monitoring Standards for the FRS Pension Plan include the following:

1. Total Fund (excluding Private Markets), Public Market Asset Classes and Tactical Asset Allocation Active Risk.
2. Private Market intra-asset class ranges versus actual allocations, where applicable.
3. Asset Class Risk and Return Objectives, where applicable.
4. Asset Class leverage exposure, where applicable.

Realized Risk may fluctuate around the monitoring standards. If risk levels materially or persistently exceed or lag the monitoring standards, a risk management response will be prepared.
