¹Fund internal rate of return includes the cash-on-cash return net of fees, expenses, and carried interest, as well as the net asset value of State Board of Administration of Florida's interest in the partnership.

Because of the long-term nature of investing in private investments, funds can produce low or negative returns in the early years of the partnership. In the first few years of the partnership, management fees are drawn from partners' capital, and portfolio companies are held at cost, leading to a potential understatement of ultimate value.

Due to numerous factors, including the lack of standardized valuation and reporting standards, the return information for private investments in this report may not reflect the expected returns of the partnerships. The returns contained in this report are calculated by or on behalf of the SBA and have not been reviewed by the general partners.

Interim returns may not be meaningful or indicative of ultimate performance during the early stages of the investment life cycle.

Some investment partnerships do not include management fees in the commitment; this may result in paid-in capital exceeding the commitment amount in those instances.

Funds with NA (not applicable) have not yet commenced or are too young to have produced meaningful returns.

Rows marked with * contain preliminary data
