#### INDEPENDENT AUDITOR'S REPORT

The Board of Trustees
State Board of Administration of Florida

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of the Florida Retirement System Trust Fund (the "Trust") administered by the State Board of Administration ("SBA") of Florida, as of and for the years ended June 30, 2020 and 2019, and the related notes to the financial statements, which collectively comprise the Trust's basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Trust's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Trust administered by the SBA as of June 30, 2020 and 2019, and the changes in financial position for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### Emphasis of Matters

As discussed in Note 1, the financial statements present only the Trust and do not purport to, and do not, present fairly the financial position of the State of Florida, the State Board of Administration of Florida or the Florida Retirement System as of June 30, 2020 and 2019, their changes in financial position, or, where applicable, their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

As described in Notes 2 and 3, the financial statements include investments valued at approximately \$40.8 billion and \$39.9 billion as of June 30, 2020 and 2019, respectively, for which fair value has been estimated by general partners and investment advisors, and reviewed and approved by the Trust's management, in the absence of readily ascertainable market values. Because of the inherent uncertainty of valuation, the estimate of values may differ from the values that would have been used had a ready market existed for the investment securities, and the differences could be material. Our opinion is not modified with respect to this matter.

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the *management's discussion and analysis* on pages 3 through 11 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 13, 2020 on our consideration of the Trust's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Trust's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Trust's internal control over financial reporting and compliance.

#### Introduction

This section of the financial statements of the Florida Retirement System (FRS) Trust Fund (the Trust) presents management's discussion and analysis of the Trust's financial position for the fiscal years ended June 30, 2020 and 2019. Please read it in conjunction with the basic financial statements and the accompanying notes, which follow this section.

As further described in Note 1 to the financial statements, the FRS Pension Plan (the Plan) is a cost-sharing, multiple-employer defined benefit pension plan for eligible members of the FRS who have elected to participate in the Plan.

The Florida Legislature is responsible for establishing Plan structure, benefit levels and contribution rates, and providing statutory authority for administering the Plan. The Plan is administered by the Division of Retirement within the Department of Management Services (DMS). DMS's responsibilities include directing actuarial studies, collecting contributions to the Plan, transmitting contributions to the State Board of Administration of Florida (the SBA) for deposit in the Trust, and making benefit payments. The SBA is responsible for investing Trust assets consistent with statutory authority.

#### **Financial Statements**

The financial reporting entity represented in the basic financial statements and accompanying notes is the Trust, which consists of the assets held in trust by the SBA for the payment of retirement benefits and reasonable administrative expenses of the Plan. The financial statements of the Trust do not include the pension liabilities of the participating employers. The assets, liabilities, and net position of the Trust are reported in the comprehensive annual financial reports (CAFRs) published by the State of Florida and the DMS.

The Trust's basic financial statements include two-year comparative statements of net position and statements of changes in net position. The statements of net position provide a measurement of the financial position of the Trust as of the end of the fiscal year. The statements of changes in net position present the results of Trust activities during the fiscal years presented in this report. The accompanying notes to the financial statements offer additional discussion that is essential for a full understanding of the data presented in the financial statements, and provide additional information regarding the Trust, such as accounting policies, significant account balances and activities, material risks, obligations, contingencies, and subsequent events, if any.

#### **Statements of Net Position**

The statements of net position present the assets, liabilities, and net position (total assets in excess of total liabilities) of the Trust as of the end of the fiscal year and are point-in-time financial statements. The following table represents condensed financial information.

|                                  | As of June 30 |         |      |           |    |         |

## **Analysis**

The Trust's net position decreased by \$2.0 billion (1.2%) and increased by \$2.4 billion (1.5%) during fiscal years 2020 and 2019, respectively. For fiscal year 2020, the decrease in net position was due primarily to the decline in investment performance caused by the Coronavirus-19 pandemic (COVID-19). The Trust's overall return remained positive, though down significantly from the previous two fiscal years. An increase in overall contributions received for investment in the Trust for both fiscal years 2020 and 2019 provided additional resources. However, deductions for benefit payments continued to rise for fiscal year 2020, adding to the overall decrease in the Trust's net position.

Trust investments generated income of approximately \$6.0 billion and \$10.0 billion during fiscal years 2020 and 2019, respectively. Global equity investment performance contributed significantly to both fiscal years' investment income, despite some periods of market volatility and the impacts of the pandemic. Global equities returned 2.1% and 5.0% for fiscal years 2020 and 2019, respectively. Fixed income investments provided additional income for the fiscal year, as a decline in yields produced continued positive results. Fixed income returns were 6.8% for both fiscal years 2020 and 2019. Private equity, strategic and real estate investment performance declined significantly for fiscal year 2020, due in part to the economic downturn. Additional information can be found in the "Investment Returns" section of Management's Discussion and Analysis.

Investment expenses totaled \$614 million, or .38% (38 basis points) of total average investments for fiscal year 2020, compared with investment expenses of \$592 million, or .37% (37 basis points) of total average investments for fiscal year 2019. The investment expenses increased by \$22 million (3.7%) and decreased by \$10 million (1.7%) during fiscal years 2020 and 2019, respectively. Investment expenses are driven in large part by assets under management (AUM). The increase in investment expenses in fiscal year 2020 was due mainly to the addition of several new private asset investments.

Investment expenses are primarily comprised of fees and expenses deducted directly from earnings in the Trust. These expenses include such items as bank fees and investment management fees paid or accrued to third party investment managers who are responsible for managing the portion of the Trust not managed internally by the SBA. Additional items in this category include the SBA investment service charge and other investment fees and expenses. The SBA investment service charge (currently .0225% of AUM) is statutorily charged to all SBA investment mandates for general investment services and is used to fund the SBA's operating costs.

### **Analysis (continued)**

Other investment fees and expenses are summarized below and generally represent expenditures not covered by the SBA investment service charge.

|                                | Fiscal Years Ended June 30 |         |       |            |    | 30      |
|--------------------------------|----------------------------|---------|-------|------------|----|---------|
| Investment expenses            |                            | 2020    |       | 2019       |    | 2018    |
|                                |                            |         | (In T | Thousands) |    |         |
| Bank fees                      | \$                         | 4,048   | \$    | 4,071      | \$ | 4,343   |

| Legal                          |                            | 3,589   |       | 3,636      |    | 2,996   |
| Derivative                     |                            | 3,014   |       | 2,163      |    | 2,496   |
| Miscellaneous                  |                            | 552     |       | 642        |    | 1,762   |
| Total other fees and expenses  |                            | 11,943  |       | 11,901     |    | 11,097  |
| Total investment expenses      | \$                         | 614,069 | \$    | 591,468    | \$ | 601,776 |

Net security lending income decreased by \$3 million (9.7%) and \$12 million (27.9%) in fiscal years 2020 and 2019, respectively. The fluctuations are due to changes in demand and pricing of loaned securities. The lending program continues to focus on maximizing earnings while managing reinvestment risk. Additional information on the securities lending program is provided in Note 3 to the financial statements.

Contributions to the Trust consist primarily of amounts received from DMS for employer and employee retirement plan contributions during the fiscal year. Total contributions to the Trust increased by \$216 million (5.6%) and \$253 million (7.0%) during fiscal years 2020 and 2019, respectively. These amounts vary from year to year based upon a number of factors such as statutory contribution rates and the number of participating employers and employees.

Deductions from the Trust include amounts needed to fund benefit payments and member-directed transfers to the FRS Investment Plan Trust Fund throughout the year. Funds sent from the Trust to DMS for benefit payments increased by \$540 million (5.2%) and \$526 million (5.4%) during fiscal years 2020 and 2019, respectively. Member-directed benefits sent to the FRS Investment Plan Trust Fund reflect elections by the FRS members to transfer their membership from the FRS Pension Plan to the FRS Investment Plan. Member-directed benefits sent to the FRS Investment Plan Trust Fund decreased by \$5 million (0.9%) and \$32 million (5.4%) during fiscal years 2020 and 2019, respectively.

#### Plan Choice1

Effective January 1, 2018, Chapter 2017-88, Laws of Florida was signed into law amending section 121.4501(4), *Florida Statutes*. The law provides that all new hires will have until the last business day of the 8th month after hire to make a choice between the FRS Pension Plan and FRS Investment Plan. If a new hire does not make an active election by the deadline date, the new hire will default into the FRS Investment Plan, except those who are enrolled in the Special Risk Class (who will continue to default to the FRS Pension Plan). The first group of new hires defaulted into the FRS Investment Plan effective October 1, 2018. For fiscal year ended June 30, 2020, 6% of all new hires defaulted to the FRS Pension Plan and 26% made an active election to enroll in the FRS Pension Plan. The SBA's Office of Defined Contribution Programs continues to monitor trend information and projections as to the effect the plan change amendment may have on the Trust.

The number of new employees eligible to make an initial retirement plan choice continues to fluctuate from year to year. The percentage of employees making active elections to the Pension Plan continues to increase and the number of employees joining through a Second Election continues to increase, as the Pension Plan remains a desirable retirement option for many employees.

| To the FRS Pension Plan                  | 1,171                      | 1,067  | 766    |  |
| To the FRS Investment Plan               | 2,638                      | 3,270  | 3,871  |  |

Plan Choice data is based on unaudited statistics received from Alight Solutions, the Plan Administrator for the FRS Investment Plan.

<sup>&</sup>lt;sup>2</sup> FRS members are granted a one-time option to transfer from one retirement plan (Pension or Investment) to the other during their FRS-covered employment. This is considered a Second Election.

#### **Contribution Rates**

The Legislature is responsible for establishing employer and employee contribution rates. Employer rates vary by membership and have steadily increased over the last three fiscal years.

|  | <b>Employee Rate</b> | Employer Rate <sup>1</sup> |         | e <sup>1</sup> |
|--|----------------------|----------------------------|---------|----------------|
| Membership Class                             | FYs 2018-20          | FY 2020                    | FY 2019 | FY 2018        |
| Regular                                      | 3.00 %               | 6.75 %                     | 6.54 %  | 6.20 %         |
| Special risk                                 | 3.00                 | 23.76                      | 22.78   | 21.55          |
| Special risk: administrative support         | 3.00                 | 36.87                      | 33.26   | 32.91          |
| Legislators                                  | 3.00                 | 54.31                      | 55.03   | 49.14          |
| Governor, Lt. Governor, and cabinet officers | 3.00                 | 54.31                      | 55.03   | 49.14          |
| State Attorney and public defenders          | 3.00                 | 54.31                      | 55.03   | 49.14          |
| Justices and judges                          | 3.00                 | 40.28                      | 39.05   | 37.92          |
| County and local elected officers            | 3.00                 | 47.10                      | 46.98   | 43.78          |
| Senior management service                    | 3.00                 | 23.69                      | 22.34   | 20.99          |
| DROP   | 0.00                 | 12.94                      | 12.37   | 11.60          |

Employer rates presented in this table do not include employer contributions for Health Insurance Subsidy (1.66% for FYs 2018-2020) or plan administrative/educational expense (.06% for FYs 2018-2020) as these amounts are not deposited into the Trust.

### **Investment Returns**

The Trust earned an overall investment return of 3.08% for fiscal year 2020, outperforming its benchmark over the trailing one-, three-, five-, ten- and fifteen-year periods. The 2020 total fund return exceeded the benchmark by 11 basis points. The 2019 total fund return exceeded the benchmark by 59 basis points.

For the fiscal years ended June 30, 2020 and 2019, the Trust's investment returns<sup>1</sup>, by major asset class, were as follows:

| Fiscal Years Ended June 30  |        |           |        |           |  |  |
|-----------------------------|--------|-----------|--------|-----------|--|--|
|                             | 20     | 2020 2019 |        |           |  |  |
| Asset Class                 | Return | Benchmark | Return | Benchmark |  |  |
| Total Fund                  | 3.08 % | 2.97 %    | 6.26 % | 5.67 %    |  |  |
| Global Equity               | 2.09   | 1.25      | 5.00   | 4.55      |  |  |
| Fixed Income                | 6.79   | 6.60      | 6.79   | 6.73      |  |  |
| Real Estate                 | 1.60   | 2.27      | 7.13   | 6.95      |  |  |
| Private Equity <sup>2</sup> | 3.40   | 4.72      | 15.46  | 6.08      |  |  |
| Strategic Investments       | -0.02  | 1.51      | 5.20   | 5.06      |  |  |
| Cash & Cash Equivalents     | 1.50   | 1.63      | 2.33   | 2.31      |  |  |

The above investment performance information for June 30, 2020 and 2019, is the investment return data supplied by the SBA's master custodian and performance measurement service provider, BNY Mellon Performance Reporting and Analytics Services. These rates of returns do not necessarily reflect the same information and accounting treatments as included in the Trust's Statements of Changes in Net Position, due to the latter's inclusion of subsequent updates to private market investment valuations, timing differences in the recognition of receivables, payables and other items, and differences in GASB accounting rules and SBA performance measurement policies. For 2020 and 2019, Total Fund performance, based on audited information as certified by BNY Mellon Performance Reporting and Analytics Services, was 3.36% and 6.04%, respectively.

More detailed information and analysis of the Trust's performance can be obtained from the SBA's Annual Investment Report, which can be found at www.sbafla.com.

<sup>&</sup>lt;sup>2</sup> Per industry convention, Private Equity returns are presented on a dollar-weighted basis. All other returns (including Total Fund) are on a time-weighted basis. Time-weighted returns show the value of one dollar invested in a portfolio for the entire period while dollar-weighted returns show an average return of all dollars in the portfolio for the period.

#### **Economic Factors**

The prevailing story for fiscal year 2020 was the onset and impact of the Coronavirus-19 pandemic (COVID-19) on public health, the global economy and global capital markets. The virus emerged as a global issue mid-year and caused an unprecedented economic dislocation. The impact on capital markets was intensified by fear of the economic repercussions driven by governmental lockdowns that swept the globe in early March. The CBOE Volatility Index (VIX) breached 80 in mid-March and equity markets fell quickly, leading to the fastest onset bear market on record. The global equity market fall reached about 33%, well over the 20% threshold normally assigned to bear markets. Bond markets were also significantly impacted. The yield on 10-year U.S. Treasury fell to 0.70% by the end of the March and credit notched up the fastest rise in spreads on record, with some spreads tripling and quintupling over government bonds from their pre-COVID-19 levels. Additionally, amidst all this was the fallout between OPEC and Russia regarding oil production limits. An oversupply and complete plunge in global demand led oil prices to plummet and oil futures to turn negative for the first time in history.

Quick policy response brought upon a rapid recovery that began in the last week of March and continued through the end of June. The government and central bank actions successfully lifted the markets, as equity and credit rebounded, and global bond yields moved lower still. The S&P 500 recorded its best monthly return in April since 1987 and, as represented by the MSCI ACWI Investable Market Index, global equities returned 19.8% in the final quarter of the fiscal year. Bond markets with embedded credit risk also recovered strongly. The U.S. high yield bond market, as represented by the Bloomberg Barclays US Corporate High Yield Total Return Index, returned 10.2%, while emerging market debt, as represented by JPM EMBI Global Diversified Index, returned 12.3% for the quarter.

Reflecting on the fiscal year-end results, we saw mixed returns across the major capital markets. The best performing securities were in the safe-haven government bond markets, though global equities generated modest, yet positive results. Represented by the MSCI All Country World IMI Index, global equities generated a 1.2% return for the one-year period. The positive results were driven by the U.S. equity market, which returned 6.5% as measured by the Russell 3000® Index. International equity markets were less fortunate. In U.S. dollar terms, developed international markets, represented by the MSCI EAFE Index, returned a negative 5.1%, while emerging markets, represented by the MSCI Emerging Markets Index, returned a negative 3.4%. However, as the U.S. dollar appreciated relative to most emerging market currencies, in local currency terms, emerging markets posted a positive 1.4% return.

Across bond markets there was a wide dispersion of returns. Generally, U.S. yields fell sharply and the U.S. bond market, as represented by the Bloomberg Barclays Aggregate Bond Index, returned 8.7%. Safe-haven government bonds performed the greatest, which posted a 10.3% return over the year, as measured by the Bloomberg Barclays U.S. Government Index. Despite an unprecedented dislocation across credit, U.S. high yield bonds were able to stay out of negative territory, which posted a 0.0% return, as measured by the JPM EMBI Global Diversified Index.

#### **Economic Factors (continued)**

Overall, for the fiscal year ended June 30, 2020, markets were able to ward off sustained negative impact due to COVID-19 with the help of significant policy support. However, the International Labor Organization estimated that an equivalent of 400 million full-time jobs were lost globally. Furthermore, the International Monetary Fund (IMF) predicts the global economy will decline by 3% in 2020, but predicts an increase of 5.8% in 2021, as economic activity normalizes. Accordingly, the economic and market impact of the COVID-19 pandemic is yet to be determined.

### **Contacting the Trust's Financial Management**

This financial report is designed to provide citizens, taxpayers, Plan members, and other interested parties with an overview of the Trust's finances and the prudent exercise of the SBA's oversight. Questions concerning any of the information provided in this report or requests for additional information should be addressed to the Chief Operating/Financial Officer, State Board of Administration of Florida, P.O. Box 13300, Tallahassee, Florida 32317.

See accompanying notes to the financial statements.

## 1. Financial Reporting Entity

The Florida Retirement System (FRS) Pension Plan (the Plan) is a cost-sharing, multiple-employer defined benefit pension plan qualified under Internal Revenue Code Section 401(a) and established by the Legislature of the State of Florida in accordance with Chapter 121, *Florida Statutes*, to provide for retirement benefits for eligible employees of the State and all participating county, municipal, district school board, community college and university employees. Under the FRS, employers and, as of July 1, 2011, employees make contributions to the Department of Management Service (DMS), Division of Retirement, the Plan administrator, which are initially deposited into the Florida Retirement System Contributions Clearing Fund, which holds all contributions for all plans of the FRS. The DMS, as the administrative agency of the Plan, provides full accounting and administration of benefit payments and contributions, commissions actuarial studies, and proposes rules and regulations for the administration of the Plan.

Chapter 121, *Florida Statutes*, established the Florida Retirement System Trust Fund (the Trust) and empowers and mandates the State Board of Administration (SBA) to receive, invest and hold the assets of the Plan in the Trust for the exclusive benefit of the Plan members and for the payment of reasonable costs of the Plan. The DMS sends employer and employee contributions to the Trust for investment by the SBA. The SBA is governed by a Board of Trustees, comprised of the Governor, as Chair, the Attorney General, and the Chief Financial Officer of the State of Florida.

The Trust is a separate legal entity within the State of Florida. These financial statements and notes include only the net position and change in net position of the Trust and do not purport to, and do not, present fairly the financial position of the State of Florida, the SBA, or the Plan as of June 30, 2020 and 2019, and the changes in their financial position for the years then ended, in conformity with accounting principles generally accepted in the United States (GAAP).

#### 2. Summary of Significant Accounting Policies

#### **Basis of Presentation**

The accompanying financial statements were prepared in conformity with GAAP as applicable to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and reporting principles. The Trust is accounted for as an investment trust fund pursuant to GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools (GASB 31), GASB Statement No. 34, Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments (GASB 34), and GASB Statement No. 63, Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position (GASB 63). As such, the Trust presents statements of net position and statements of changes in net position.

## 2. Summary of Significant Accounting Policies (continued)

### **Measurement Focus and Basis of Accounting**

The financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recognized when incurred, regardless of when the related cash flow takes place.

#### **Cash and Cash Equivalents**

The Trust reports all cash on hand and deposits in banks, including demand deposits, time deposits, and non-negotiable certificates of deposit as cash and cash equivalents.

#### **Investment Valuation**

Section 215.47, *Florida Statutes*, gives the SBA the authority to invest in a range of instruments, including security lending agreements. The Trust's investments are reported in accordance with GASB reporting standards. Realized and unrealized gains and losses are reflected in the statements of changes in net position as "net increase/(decrease) in fair value of investments."

The fair values of the Trust's assets are obtained or estimated in accordance with the Global Pricing Guidelines established with the SBA's custodian bank, BNY Mellon, which uses a variety of independent pricing sources and designates certain vendors as the primary source based on asset type, class or issue. BNY Mellon monitors pricing information supplied by these primary sources and may use a supplemental pricing source or change the primary pricing source if any of the following occurs:

- The price of a security is not received from the primary pricing source.
- The primary pricing source no longer provides prices for a particular asset type, class or issue.
- The SBA or its portfolio investment manager challenges a price and BNY Mellon reviews the price with the vendor, who agrees that the price provided by that vendor may not be appropriate.
- The price from the primary source exceeds price tolerance checkpoints and results in a vendor comparison review where another source is deemed to be more appropriate by BNY Mellon.

## 2. Summary of Significant Accounting Policies (continued)

When a portfolio includes securities or instruments for which the custodian bank does not receive fair value information from its vendor pricing source, the custodian bank uses a "non-vendor pricing source". Examples include, but are not limited to, limited partnerships or similar private investment vehicles that do not actively trade through established exchange mechanisms; other private placements where there is limited or no information in the market place; and unique fixed income and equity instruments. The SBA does not provide direction regarding the substitution of prices in instances where securities or instruments are in the portfolio of an investment manager appointed by the SBA. In cases where the SBA directed the purchase of securities or instruments, BNY Mellon may obtain the non-vendor prices by contacting the SBA only if it is not commercially reasonable to directly obtain the non-vendor price information from the broker of record, as identified by the SBA.

For private market investments, where no readily ascertainable market value exists (including limited partnerships, hedge funds, direct-owned real estate, and real estate pooled funds), fair values for the individual investments are based on the net asset value (NAV), which equates to the capital account balance, at the closest available reporting period, as communicated by the general partner and/or investment manager, adjusted for subsequent contributions and distributions. The valuation techniques vary based upon investment type and involve a certain degree of judgment. The most significant input into the NAV of an entity is the value of its investment holdings. The NAV is provided by the general partner and/or investment manager and reviewed by management.

Annually, the financial statements of all private market investments are audited by independent auditors. Private market investments, in which the SBA has a controlling interest and are reported at cost per the investment manager, are also required to be valued, generally annually, by independent, licensed external appraisers selected by an appraisal management company retained by the SBA.

Money market funds and repurchase agreements are reported at amortized cost. Commingled funds are generally reported at the NAV of units held at the end of the period based upon the value of the underlying investments as reported by the external investment manager. Certain commingled funds may be valued under different pricing methods depending on the nature of the fund.

All derivative financial instruments are reported at fair value in the statements of net position. The instruments are adjusted to fair value at least monthly, with valuation changes recognized during the period as gains or losses in the statements of changes in net position and included in the "net increase/(decrease) in fair value of investments". The nature and use of derivative instruments is discussed in Note 3 to the financial statements.

Because of the inherent uncertainty of the valuation using pricing methodologies other than the quoted market prices, the estimated fair values may differ from the values that would have been used had an active market existed.

## 2. Summary of Significant Accounting Policies (continued)

#### Plan Member-Directed Benefits to/from DMS and the FRS Investment Plan Trust Fund

The DMS sends employer and employee contributions to the Trust for investment purposes, and may also request return of funds from the Trust to meet benefit obligations of the FRS. The members of the FRS Investment Plan Trust Fund may direct their Plan account balance within the FRS Investment Plan Trust Fund be sent to the Trust to effectuate their second election. DMS will also fulfill member-directed second election requests for Trust account balances to be sent from the Trust to the FRS Investment Plan Trust Fund. To ensure timely payment, the Trust estimates such obligations at the first of each month and allocates them to the Trust's public market asset classes (excluding the Cash asset class). These allocations constitute liquidity assessments, which the asset classes are required to provide in a prudent, but reasonable timeframe.

At fiscal year-end, the Trust accrues a receivable from DMS for employer and employee contributions due for the month of June, but the amount is received by the Trust the following fiscal year. The Trust accrues a payable at fiscal year-end for the expected amounts to be requested by DMS in order to fund the Deferred Retirement Option Program (DROP) payouts and benefit obligations as of June 30. DMS maintains records for all employer and employee contributions to the Plan.

# **Income Recognition**

Investment transactions are accounted for on a trade (investment) date basis. Interest and dividend income is recorded on the accrual basis, with dividends accruing on the ex-dividend date.

#### **Management Fees and Investment Service Expenses**

The SBA hires external investment managers to invest a significant portion of the Trust's investment assets. The Trust typically pays investment management fees based on individually negotiated investment management agreements. The fees, usually paid quarterly, may be based on a sliding scale of the portfolio's net asset value at quarter-end, calculated by multiplying each level of net position by a specified basis point charge, or may be performance-related, typically associated with exceeding a market benchmark or hurdle rate. Fees are paid from the appropriate manager's portfolio and are recognized as an expense over the time period for which the fees are applicable. Certain investment management fees, usually in private equity portfolios, are paid at the beginning of the period. These fees are recorded as prepaid manager fee assets on the statements of net position and are expensed over their applicable time period.

### 2. Summary of Significant Accounting Policies (continued)

Pursuant to Section 215.515, *Florida Statutes*, the SBA charges the Trust a monthly investment service charge based on the month-end net asset value of the total Trust. The service charge is calculated and deducted from the Trust after each month's total net asset value of the Trust is determined. These charges are reported on the statements of changes in net position as part of the Trust's investment expenses. During fiscal years 2020 and 2019, the SBA investment service charge was .0225% (annualized).

#### **Use of Estimates**

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of revenues (additions) and expenses (deductions) during the reporting period. Actual results could differ from those estimates.

Additionally, the ongoing COVID-19 pandemic and restrictions on non-essential businesses have caused disruption in the U.S. and global economies. Despite significant market rebounds across many asset classes in the second quarter of 2020, the continued rapid development of this situation and uncertainty regarding potential economic recovery precludes any prediction as to the ultimate adverse impact of COVID-19 on financial market and economic conditions. The estimates and assumptions underlying these financial statements are based on the information available as of June 30, 2020, including judgments about the financial market and economic conditions, which may change over time.

#### Reclassifications

In the financial statements and notes, certain prior year amounts have been reclassified to conform to the current year presentation and provide more consistent reporting. These reclassifications had no effect on the Trust's net position or changes in net position.

#### **New Accounting Standards**

In May 2020, the GASB issued Statement No. 95, Postponement of the Effective Dates of Certain Authoritative Guidance (GASB 95). The primary objective of this Statement is to provide temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. That objective is accomplished by postponing the effective dates of certain provisions in Statements and Implementation Guides that first became effective or are scheduled to become effective for periods beginning after June 15, 2018, and later. The requirements of this Statement are effective immediately.

### 2. Summary of Significant Accounting Policies (continued)

In March 2020, the GASB issued Statement No. 93, Replacement of Interbank Offered Rates (GASB 93). The objective of this Statement is to address accounting and financial reporting implications that result from the replacement of an interbank offered rate (IBOR). Some governments have entered into agreements in which variable payments made or received depend on an IBOR most notably, the London Interbank Offered Rate (LIBOR). As a result of global reference rate reform, LIBOR is expected to cease to exist in its current form at the end of 2021, prompting governments to amend or replace financial instruments for the purpose of replacing LIBOR with other reference rates, by either changing the reference rate or adding or changing fallback provisions related to the reference rate. The removal of LIBOR as an appropriate benchmark interest rate is effective for reporting periods ending after December 31, 2021. The replacement of an IBOR upon which variable payments depend in lease contracts are effective for fiscal years periods beginning after June 15, 2021, and all reporting periods thereafter. All other requirements of this Statement are effective for reporting periods beginning after June 15, 2020. We continue to review the applicability of this Statement as it pertains to the Trust.

In January 2017, the GASB issued Statement No. 84, Fiduciary Activities (GASB 84). The principal objective of this Statement is to enhance the consistency and comparability of fiduciary activity reporting by state and local governments. The requirements of this Statement will enhance consistency and comparability by (1) establishing specific criteria for identifying activities that should be reported as fiduciary activities and (2) clarifying whether and how business-type activities should report their fiduciary activities. Additionally, this Statement establishes criteria for identifying fiduciary activities of all state and local governments. The focus of the criteria generally is on (1) whether a government is controlling the assets of the fiduciary activity and (2) the beneficiaries with whom a fiduciary relationship exists. Separate criteria are included to identify fiduciary component units and postemployment benefit arrangements that are fiduciary activities. The requirements of this Statement are effective for reporting periods beginning after December 15, 2019. Please note, the requirements of this Statement was initially effective for reporting periods beginning after December 15, 2018, but was extended by one year to provide temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. Please refer to GASB Statement No. 95, Postponement of the Effective Dates of Certain Authoritative Guidance (GASB 95). We continue to review the applicability of this Statement as it pertains to the Trust.

#### 3. Deposits and Investments

#### **Deposits**

As of June 30, 2020, the recorded carrying amount of deposits totaled \$92.9 million and consisted of U.S. dollars and foreign currencies (U.S. value) in the amounts of \$262 thousand and \$92.6 million, respectively.

As of June 30, 2019, the recorded carrying amount of deposits totaled \$94.9 million and consisted of U.S. dollars and foreign currencies (U.S. value) in the amounts of \$1.2 million and \$93.7 million, respectively.

## 3. Deposits and Investments (continued)

#### **Investment Classifications**

The SBA has the authority and responsibility for the investment of the Trust assets pursuant to Section 215.47, *Florida Statutes*, in a range of instruments including, but not limited to: federally guaranteed obligations, certain state bonds, corporate bonds, commercial paper, banker's acceptances, short-term obligations purchased individually or in pooled accounts, interests in certain open-end and closed-end management type investment companies or investment trusts, common and preferred stock, repurchase and reverse repurchase agreements, real estate and alternative investments. The SBA may also buy and sell futures contracts, option contracts, and domestic or foreign notional principal contracts. The following are the major asset types, invested in by the Trust, as reported on the statements of net position. The classifications below do not necessarily represent the asset class portfolios for which investment performance is measured.

#### • Fixed Income

Fixed income securities consist of short-term and long-term obligations. Short-term obligations consist primarily of U.S. Treasury and government-sponsored securities, money market funds, commercial paper, certificates of deposit, repurchase agreements, and other similar instruments. These investments are available to meet cash needs as they arise. Long-term obligations are comprised of both domestic and international securities and consist primarily of negotiable obligations of the U.S. Government and U.S. Government-sponsored agencies, corporate bonds, and securitized offerings such as mortgage-backed securities (MBS), collateralized mortgage obligations (CMO), asset-backed securities (ABS), and commercial mortgage-backed securities (CMBS).

#### • Equity

Equity investments represent both domestic and international stocks traded on major stock exchanges. Also included as equities are commingled funds, exchange-traded funds (ETFs), real estate investment trusts (REITs), equity-linked notes, participatory notes (P-Notes) and other securities. A REIT is a type of security that invests in real estate through property or mortgages and trades like a stock on the major exchanges. An equity-linked note is an instrument whose return is determined by the performance of a single equity security, a basket of equity securities, or an equity index.

## 3. Deposits and Investments (continued)

#### • Alternative

The Trust invests in various funds and investment vehicles, which employ specific strategies and co-investments often outside the traditional asset classes. The most common investment categories for these funds include domestic and international private equity, activist equity, private debt/credit opportunities, real assets, insurance funds and hedge funds. The structure of these investments is generally a limited partnership or limited liability company and tends to be long term and illiquid in nature. Due to this type of structure, private debt/credit opportunities typically do not have established ratings or durations associated with these investments.

#### • Real Estate

Real estate investments include ownership primarily in office, multifamily, retail, industrial and agricultural properties, and secondarily in several alternative property types including self-storage and student housing. The program is focused on core risk strategies, but also includes value-add and opportunistic risk strategies. These assets are held directly, as part of a joint venture, and in open-ended and closed-ended commingled funds. Real assets and real estate partnership investments are classified as Alternative Investments for financial reporting purposes.

#### Other

Included in this type are investments such as foreign currency contracts, futures, options, and swaps.

# 3. Deposits and Investments (continued)

The following schedule discloses the Trust's investments, by type, at June 30, 2020 and 2019.

|                                       | As of June 30   |                |  |  |  |
|---------------------------------------|-----------------|----------------|--|--|--|
| Investment Type                       | 2020            | 2019           |  |  |  |
|                                       | (In The         | ousands)       |  |  |  |
| Fixed income                          |                 |                |  |  |  |
| Certificates of deposit               | \$ -            | \$ 324,980     |  |  |  |
| Commercial paper                      | 1,127,836       | 3,121,322      |  |  |  |

# 3. Deposits and Investments (continued)

### **Pledged Collateral**

Certain investments included in the above schedule were pledged as collateral with the SBA's futures and swaps clearing counterparties to meet initial margin requirements. Investments pledged as collateral as of June 30, 2020 and June 30, 2019, are presented below:

|                             |    | 30       |       |        |  |
|-----------------------------|----|----------|-------|--------|--|
| <b>Investment Type</b>      |    | 2020     | 2019  |        |  |
|                             |    | (In Thor | usand | s)     |  |
| U.S. guaranteed obligations | \$ | 118,767  | \$    | 74,634 |  |
| Federal agencies            |    | 1,101    |       | 13,450 |  |
| Total pledged collateral    | \$ | 119,868  | \$    | 88,084 |  |

In addition, cash required to open futures and swap contracts (initial margins) may be pledged as collateral with the SBA's futures and swap counterparties. Such initial margin amounts are reflected as "Margin receivable from counterparty" on the statements of net position. Pursuant to these types of contracts, and also pending foreign currency contracts and commitments to purchase (TBAs), the Trust agrees to receive or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receivables and payables are known as variation margin, which are reflected as "Margin receivable from counterparty" or "Margin payable to counterparty" on the statements of net position. All initial and variation margin amounts receivable from or payable to the broker as of June 30, 2020 and June 30, 2019, are presented below:

|   | As of June 30 |         |       |        |

### 3. Deposits and Investments (continued)

#### Fair Value Hierarchy

The Trust's investments are measured and reported at fair value and classified according to the following hierarchy:

- <u>Level 1</u> Investments reflect unadjusted quoted prices in active markets for identical assets or liabilities.
- <u>Level 2</u> Investments reflect prices based on significant observable inputs (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly. These inputs may be derived principally from, or corroborated by, observable market data through correlation or by other means.
- <u>Level 3</u> Investments reflect prices based upon unobservable inputs, including situations where there is little market activity, if any, for assets or liabilities.

The categorization of investments within the hierarchy is based upon the pricing transparency of the instrument and should not be perceived as the particular investment's risk.

Fixed income and equity securities classified as Level 1 of the fair value hierarchy are valued using quoted prices at June 30 (or the most recent market close date if the markets are closed on June 30) in active markets from the custodian bank's external pricing vendors, which utilize primary exchanges.

Fixed income securities classified as Level 2 are valued using evaluated prices from the custodian bank's external pricing vendors. The pricing methodology involves the use of evaluation models such as matrix pricing, which is based on the securities' relationship to benchmark quoted prices. Other evaluation models use actual trade data, collateral attributes, broker bids, new issue pricings and other observable market information.

Equity securities classified as Level 2 are valued using evaluated prices from the custodial bank's external pricing vendors, or alternative pricing source, such as investment managers, if information is not available from the primary vendors.

Fixed income and equity securities classified as Level 3 are valued using prices from the custodian bank's external pricing vendors or an alternative pricing source, utilizing inputs such as stale prices, cash flow models, or broker bids.

Derivative instruments classified as Level 1 of the fair value hierarchy are valued using exchange-traded prices as provided by the custodian bank's external pricing vendors. Derivative instruments classified as Level 2 receive clearing house prices, which are based on models that reflect the contractual terms of the derivatives.

## 3. Deposits and Investments (continued)

Private equity funds and real estate direct investments classified as Level 3 were valued using the methodology as described in the footnotes for the *Additional GASB 72 Required Disclosures* tables, footnotes 13 and 15, respectively. Other private equity funds are measured at net asset value (NAV).

Certain investments, such as money market funds and repurchase agreements, are carried at amortized cost, and not priced at fair value. Commingled investments are generally measured at the net asset value (NAV) per share (or its equivalent) as provided by the investment manager. Commingled funds classified as Level 2 are valued using observable inputs that are market corroborated.

The Trust has the following fair value measurements as of June 30, 2020 and June 30, 2019.

<sup>1</sup> Commingled International Equity Funds: The six funds in this group are primarily invested in publically traded international equity securities. Three of these funds focus on emerging markets. Each are valued at the NAV of units held at the end of the period based upon the fair value of the underlying investments. Three funds within this strategy are redeemable daily, two funds are redeemable monthly, and the remaining fund is currently in the liquidation process with a residual balance remaining.

<sup>&</sup>lt;sup>2</sup> Commingled Real Estate Investment Funds: The eight funds in this group consist primarily of real estate investments owned directly or through partnership interests located in the United States. These investments include multi-family, industrial, retail, office, apartments and mortgage loans on income producing property. Each are valued at the NAV of units held at the end of the period based upon the fair value of the underlying investments. All funds within this strategy are eligible for redemption quarterly.

<sup>&</sup>lt;sup>3</sup> Activist Equity Funds: The three funds in this group invest in public companies with the intent to effect positive change through influencing management. The funds may be structured with a focus on specific domestic or foreign geographic regions. These investments are valued at the NAV per share. One fund (approximately 50% of this strategy) is currently eligible for redemption monthly. Another fund (approximately 27% of this strategy) is eligible for redemption in six months due to annual lock-up restrictions. The remaining fund (approximately 23% of this strategy) is subject to contractual lock-up restrictions and is not currently eligible for redemption.

Diversifying Strategies (Managed Futures) Hedge Funds: The three funds that make up this group primarily trade equity and commodity futures, but can also participate in indexes, rates and currencies across global markets. These funds use a systematic approach and focus on trends in price and other market signals. These investments are valued at the NAV per share. All funds within this strategy are redeemable within a month or less, as they are not subject to lock-up restrictions.

<sup>5</sup> Equity Long/Short Hedge Funds: Consisting of three funds, this strategy invests both long and short, primarily in U.S. and global stocks that are mispriced by the markets. These managers vary in their use of short selling, leverage and definitions of growth or value. These funds are valued at the NAV per share. Two funds (approximately 64% of this strategy) are currently eligible for redemption monthly, while the remaining fund (approximately 36% of this strategy) is subject to contractual lock-up restrictions and is not currently eligible for redemption.

- 6 Event-Driven Hedge Funds: The two funds in this group seek to gain an advantage from pricing inefficiencies that may occur in the onset or aftermath of a corporate action or related event. These investments are valued at the NAV per share. One fund (approximately 98% of this strategy) is redeemable in eighteen months due to biennial lock-up restrictions. The remaining fund (approximately 2% of this strategy) is currently winding down and full liquidation is expected by September 2020.
- Global Macro Hedge Funds: Consisting of five funds, which base their holdings (such as long and short positions in various equity, fixed income, currency, and futures markets) primarily on overall economic and political views of various countries. These funds are valued at the NAV per share. All funds in this strategy are no longer subject to contractual lock-up, and are redeemable in three months or less due to monthly and quarterly redemption restrictions.
- 8 Multi-Strategy Hedge Funds: The four funds in this group aim to diversify risks and reduce volatility by combining other strategies. These strategies are usually a mix of Equity Long/Short, Event-Driven, Opportunistic Debt and Relative Value. These funds are valued at the NAV per share. Two funds (approximately 42% of this strategy) are currently eligible for redemption in three months due to quarterly redemption restrictions. One fund (approximately 25% of this strategy) is eligible for redemption in six months or less due to annual redemption restrictions. The remaining fund (approximately 33% of this strategy) is eligible for redemption biennially (for each commitment) with the next redemption in six months.
- Opportunistic-Debt Hedge Funds: Consisting of four funds that pursue various strategies and asset classes, with an emphasis on mispriced debt or equity of companies in distress. These managers vary in their focus on early versus late stage situations, senior versus subordinated levels on the capital structure and non-traditional areas including high yield bonds and Emerging Markets debt, and may also pursue relative value and arbitrage strategies with various debt instruments. These funds are valued at the NAV per share. Three funds (approximately 72% of this strategy) are currently eligible for redemption in three months due to quarterly redemption restrictions. The remaining fund (approximately 28% of this strategy) is eligible for redemption in six months due to annual redemption restrictions.
- Relative Value Hedge Funds: Consisting of two funds, this strategy focuses on benefiting from valuation discrepancies that may be present in related financial instruments by simultaneously purchasing (long) or selling (short) these instruments. These investments are valued at the NAV per share. All funds in this strategy are no longer subject to contractual lock-up, and are redeemable in three months due to quarterly redemption restrictions.
- Insurance Funds: The six funds in this group invest primarily in reinsurance contracts and insurance-linked securities. These investments are valued at NAV per share. One fund (approximately 30%) has varying restrictions due to underlying investment funds and redeemable within one to three months. Another fund (approximately 22%) is eligible for redemption in six months, subject to exit restrictions. Two funds (approximately 38%) are eligible for redemption in seven months or less due to biannual redemption restrictions. The remaining two funds (approximately 10%) are not eligible for redemption due to contractual lock-up restrictions.
- Private Debt/Credit Opportunity Funds: There are 59 private debt/credit funds investing primarily in Distressed, Mezzanine and Loans with some exposure to Special Situations. The fair value of these funds has been determined using the NAV at June 30, 2020 or one quarter in arrears adjusted for current quarter cash flows. These funds are not eligible for redemption. Distributions are received as underlying investments within the funds are liquidated, which on average can occur over the span of five to ten years.
- 13 Private Equity Funds: There are 225 private equity funds investing primarily in Leveraged Buyouts funds, Venture Capital funds, Secondary funds and Growth funds with some exposure to Special Situations, Diversifying Strategies and GP Investments. The fair value of 223 funds has been determined using the NAV at June 30, 2020 or one quarter in arrears adjusted for current quarter cash flows. The fair value of the remaining 2 funds (approximately 2% of the value of these investments) is based on external appraisals at June 30, 2020 and classified as Level 3. These funds are not eligible for redemption. Distributions are received as underlying investments within the funds are liquidated, which on average can occur over the span of five to ten years.
- Private Real Asset Funds: There are 81 real asset funds, 55 of which invest in real estate assets such as commercial office buildings, retail properties, multi-family residential properties, developments or hotels. In addition, the funds may be structured with a focus on specific geographic domestic or foreign regions. The remaining 26 funds invest in infrastructure, timberland, transportation and commodities. The fair value of these funds has been determined using the NAV at June 30, 2020 or one quarter in arrears adjusted for current quarter cash flows. These funds are not eligible for redemption. Distributions are received as underlying investments within the funds are liquidated, which on average can occur over the span of five to ten years.
- 15 Direct Real Estate Investments: There are 69 direct owned/joint venture real estate assets that are valued based on annual external and/or quarterly internal appraisals and are classified as Level 3.

<sup>1</sup> Commingled International Equity Funds: The six funds in this group are primarily invested in publically traded international equity securities. Three of these funds focus on emerging markets. Each are valued at the NAV of units held at the end of the period based upon the fair value of the underlying investments. Four funds within this strategy are redeemable daily and two funds are redeemable monthly.

<sup>&</sup>lt;sup>2</sup> Commingled Real Estate Investment Funds: The eight funds in this group consist primarily of real estate investments owned directly or through partnership interests located in the United States. These investments include multi-family, industrial, retail, office, apartments and mortgage loans on income producing property. Each are valued at the NAV of units held at the end of the period based upon the fair value of the underlying investments. All funds within this strategy are eligible for redemption quarterly.

Activist Equity Funds: The three funds in this group invest in public companies with the intent to effect positive change through influencing management. The funds may be structured with a focus on specific domestic or foreign geographic regions. These investments are valued at the NAV per share. One fund (approximately 42% of this strategy) is currently eligible for redemption monthly. Another fund (approximately 34% of this strategy) is eligible for redemption in six months due to annual lock-up restrictions. The remaining fund (approximately 24% of this strategy) is eligible for redemption in nine months due to contractual lock-up restriction.

Diversifying Strategies (Managed Futures) Hedge Funds: The three funds that make up this group primarily trade equity and commodity futures, but can also participate in indexes, rates and currencies across global markets. These funds use a systematic approach and focus on trends in price and other market signals. These investments are valued at the NAV per share. All funds within this strategy are redeemable within a month or less, as they are not subject to lock-up restrictions.

<sup>&</sup>lt;sup>5</sup> Equity Long/Short Hedge Funds: Consisting of four funds, this strategy invests both long and short, primarily in U.S. and global stocks that are mispriced by the markets. These managers vary in their use of short selling, leverage and definitions of growth or value. These funds are valued at the NAV per share. Two funds (approximately 32% of this strategy) are currently eligible for redemption monthly, while the remaining two funds (approximately 68% of this strategy) are redeemable in three months or less due to quarterly redemption restrictions.

<sup>6</sup> Event-Driven Hedge Funds: The two funds in this group seek to gain an advantage from pricing inefficiencies that may occur in the onset or aftermath of a corporate action or related event. These investments are valued at the NAV per share. The funds in this strategy are no longer under contractual lock-up, but due to exit restrictions, the redemption period ranges from three to six months.

- Global Macro Hedge Funds: Consisting of six funds, which base their holdings (such as long and short positions in various equity, fixed income, currency, and futures markets) primarily on overall economic and political views of various countries. These funds are valued at the NAV per share. All funds in this strategy are no longer subject to contractual lock-up, and are redeemable in three months or less due to monthly and quarterly redemption restrictions.
- Multi-Strategy Hedge Funds: The three funds in this group aim to diversify risks and reduce volatility by combining other strategies. These strategies are usually a mix of Equity Long/Short, Event-Driven, Opportunistic Debt and Relative Value. These funds are valued at the NAV per share. One fund (approximately 30% of this strategy) is eligible for redemption in six months or less due to annual redemption restrictions. Another fund (approximately 44% of this strategy) is eligible for redemption biennially with the next redemption in five months. The remaining fund (approximately 26% of this strategy) is eligible for redemption quarterly with the next redemption in three months.
- Opportunistic-Debt Hedge Funds: Consisting of four funds that pursue various strategies and asset classes, with an emphasis on mispriced debt or equity of companies in distress. These managers vary in their focus on early versus late stage situations, senior versus subordinated levels on the capital structure and non-traditional areas including high yield bonds and Emerging Markets debt, and may also pursue relative value and arbitrage strategies with various debt instruments. These funds are valued at the NAV per share. One fund (approximately 29% of this strategy) is eligible for redemption in six months due to annual redemption restrictions. Three funds (approximately 71% of this strategy) are currently eligible for redemption in three months due to quarterly redemption restrictions.
- 10 Relative Value Hedge Funds: Consisting of three funds, this strategy focuses on benefiting from valuation discrepancies that may be present in related financial instruments by simultaneously purchasing (long) or selling (short) these instruments. These investments are valued at the NAV per share. All funds in this strategy are no longer subject to contractual lock-up, and are redeemable in three months or less due to quarterly redemption restrictions.
- Insurance Funds: The five funds in this group invest primarily in reinsurance contracts and insurance-linked securities. These investments are valued at NAV per share. Two funds (approximately 39%) are eligible for redemption in seven months or less due to biannual redemption restrictions. One fund (approximately 26%) is eligible for redemption in six months, subject to exit restrictions. One fund (approximately 29%) has varying restrictions due to underlying investment funds and redeemable within one to three months. The remaining fund (approximately 6%) is not eligible for redemption due to contractual lock-up restrictions.
- Private Debt/Credit Opportunity Funds: There are 54 private debt/credit funds investing primarily in Distressed, Mezzanine and Loans with some exposure to Special Situations. The fair value of these funds has been determined using the NAV at June 30, 2019 or one quarter in arrears adjusted for current quarter cash flows. These funds are not eligible for redemption. Distributions are received as underlying investments within the funds are liquidated, which on average can occur over the span of five to ten years.
- Private Equity Funds: There are 210 private equity funds investing primarily in Leveraged Buyouts funds, Venture Capital funds, Secondary funds and Growth funds with some exposure to Special Situations, Diversifying Strategies and GP Investments. The fair value of 208 funds has been determined using the NAV at June 30, 2019 or one quarter in arrears adjusted for current quarter cash flows. The fair value of the remaining two funds (approximately 2% of the value of these investments) is based on external appraisals at June 30, 2019 and classified as Level 3. These funds are not eligible for redemption. Distributions are received as underlying investments within the funds are liquidated, which on average can occur over the span of five to ten years.
- Private Real Asset Funds: There are 74 real asset funds, 52 of which invest in real estate assets such as commercial office buildings, retail properties, multi-family residential properties, developments or hotels. In addition, the funds may be structured with a focus on specific geographic domestic or foreign regions. The remaining 22 funds invest in infrastructure, timberland, transportation and commodities. The fair value of these funds has been determined using the NAV at June 30, 2019 or one quarter in arrears adjusted for current quarter cash flows. These funds are not eligible for redemption. Distributions are received as underlying investments within the funds are liquidated, which on average can occur over the span of five to ten years.
- 15 Direct Real Estate Investments: There are 69 direct owned/joint venture real estate assets that are valued based on annual external and/or quarterly internal appraisals and are classified as Level 3.

### 3. Deposits and Investments (continued)

### **Deposit and Investment Risk**

The Trust has deposits and a broad range of financial investments exposed to various risks, including overall market volatility. Due to the level of risk associated with certain financial investments, it is reasonably possible that changes in the values of financial investments will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

GASB Statement No. 40, *Deposit and Investment Risk Disclosures*, requires that certain risks be discussed in the financial statements. These risks include credit risk, custodial credit risk, concentration of credit risk, interest rate risk, and foreign currency risk. Each of these risks is discussed in more detail below.

#### **Credit Risk**

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Credit quality ratings are used as an assessment of creditworthiness and are assigned by Nationally Recognized Statistical Rating Organizations (NRSROs). These ratings are disclosed in aggregate by investment type for the securities held as of the financial statement date.

The SBA, in compliance with Section 215.47, Florida Statutes, has adopted certain investment policies with regard to credit risk of fixed income securities, which generally are managed through individual portfolios within various asset classes. Some of the individual portfolios have slightly different restrictions on credit quality.

For the Short-Term Portfolio, securities must be high quality at the time of purchase. For short-term investment ratings, this is defined as the highest applicable rating from one of the NRSROs. For long-term investment ratings, this is defined as being a minimum rating of A from one of the NRSROs. Securities of a single issuer are generally limited to 5% of the market value of the portfolio (excluding U.S. Treasuries and Agencies).

Generally, securities in other major portfolios, such as the Mortgage Index Portfolio, Intermediate Aggregate Less MBS Index Portfolio and the Core Portfolio, should be rated investment grade by at least one of the NRSROs at the time of purchase allowing a very small allocation to below investment grade (down to BB-/Ba3) for the Core Portfolio. Securities for a single issuer are generally limited to 5% of the fair value of the portfolio (excluding U.S. Treasuries and Agencies).

The Mortgage Index Portfolio limits securities generally to those issued by the Government National Mortgage Association (GNMA), Federal National Mortgage Association (FNMA), and Federal Home Loan Mortgage Corporation (FHLMC). No specific credit rating criteria are listed.

### 3. Deposits and Investments (continued)

The Intermediate Aggregate Less MBS Index Portfolio and the Core Portfolio allow U.S. Treasuries, U.S. Government Agencies, corporates, mortgage and asset backed securities, foreign sovereign debt, and municipals as well.

For security lending portfolios, eligible cash collateral investments are the following:

- \* Tri-party qualified repurchase obligations are collateralized by U.S. Treasury bills, notes, bonds, and/or strips, U.S. Government Agency securities, U.S. Government Agency mortgage-backed securities, and U.S. Equity securities. U.S. Treasury and Government Agencies must maintain a market value of at least 102% of the market value of the securities subject to being repurchased and U.S. equities must maintain a market value of at least 110% of the market value of the securities subject to being repurchased.
- \* Money market mutual funds regulated by SEC rule 2a-7 and rated the highest applicable rating by at least one of the NRSROs.
- \* U.S. Treasury bills, notes, and bonds.

Security lending investments that were purchased prior to the policy guidelines established in December 2008 are being held to maturity in existing lending portfolios.

## 3. Deposits and Investments (continued)

The following tables disclose credit quality ratings related to credit risk on investments held in the Trust at June 30, 2020 and 2019.

|                                     |               | As of June 30, 2020 |              |              |              |            |                       |              |               |

<sup>&</sup>lt;sup>1</sup> S&P ratings were primarily used. If S&P did not provide a rating or did not provide the rating with the greatest degree of risk, then Moody's ratings were used. If neither rating agency issued a rating, the security was listed as "NR" (not rated). Long-term ratings are presented except for commercial paper and money market funds.

<sup>&</sup>lt;sup>2</sup> All investments are included in this table, including security lending collateral investments.

<sup>&</sup>lt;sup>3</sup> U.S. guaranteed obligations and collateral for repurchase agreements, which are explicitly guaranteed by the U.S. Government, do not require disclosure of credit quality.

<sup>&</sup>lt;sup>4</sup> Federal Agency TBAs and mortgage-backed securities are classified as "NR" because they do not have explicit credit ratings on individual securities.

# 3. Deposits and Investments (continued)

| Total fixed incom  |                           | \$ 36,586,345       |    |             |              |    |         |       |          |    |                       |              |      |           |

S&P ratings were primarily used. If S&P did not provide a rating or did not provide the rating with the greatest degree of risk, then Moody's ratings were used. If neither rating agency issued a rating, the security was listed as "NR" (not rated). Long-term ratings are presented except for commercial paper and money market funds.

<sup>&</sup>lt;sup>2</sup> All investments are included in this table, including security lending collateral investments.

<sup>&</sup>lt;sup>3</sup> U.S. guaranteed obligations and collateral for repurchase agreements, which are explicitly guaranteed by the U.S. Government, do not require disclosure of credit quality.

<sup>&</sup>lt;sup>4</sup> Federal Agency TBAs and mortgage-backed securities are classified as "NR" because they do not have explicit credit ratings on individual securities.

#### 3. Deposits and Investments (continued)

All futures, options and swaps contracts held by the Trust at June 30, 2020 and 2019, were exchange-traded, therefore minimizing counterparty credit risk through the use of futures and swaps clearing merchants and clearing houses.

The Trust may enter into contracts that allow for close-out netting with certain counterparties. In the event of default or early termination, the contract permits the non-defaulting party the right to close-out all transactions in a single net settlement to one net amount payable by one counterparty to the other. The aggregate fair value of non-exchange traded derivatives subject to close-out netting totaled \$(4.1) million and \$(4.9) million as of June 30, 2020 and 2019, respectively.

Counterparty credit ratings related to credit risk for forward currency contracts held at June 30, 2020 and 2019, are presented below.

#### 3. Deposits and Investments (continued)

#### **Custodial Credit Risk**

Custodial credit risk is the risk that if a depository financial institution or counterparty fails, the Trust will not be able to recover the value of its deposits, investments or collateral securities in the possession of an outside party.

As stated in SBA's custodial credit policy, the SBA seeks to minimize custodial credit risk through the use of trust accounts maintained at top tier third-party custodian banks, whose creditworthiness is monitored by the SBA. To the extent possible, negotiated trust and custody contracts shall require that all deposits, investments and collateral be held in accounts in the SBA's name, or in the case of certain foreign investments, in an omnibus client account, but separate and apart from the assets of the custodian banks. This policy applies to investments evidenced by cash or securities, but does not apply to investments evidenced by contractual agreements such as alternatives, real estate, cleared derivative instruments (futures, options and swaps), external investment pools or open-ended mutual funds. These types of investments are not exposed to custodial credit risk because their existence is not evidenced by securities that exist in physical or book entry form. In addition, un-invested cash for all portfolios/funds under SBA management is generally swept nightly into overnight investments, thereby reducing the Trust's exposure to custodial credit risk. On occasion, however, the Trust's cash balances can exceed federally-insured limits.

All U.S. dollar deposits at the SBA's custodian bank were covered by federal depository insurance (FDIC) as of June 30, 2020 and 2019. The remaining uninsured and uncollateralized deposits, totaling \$92.6 million and \$93.7 million as of June 30, 2020 and 2019, respectively, were held in foreign currencies in the SBA's custodian nominee name.

Presented below are investments that were uninsured and unregistered, with securities held by the counterparty, or by the counterparty's trust department but not in the SBA's name, as of June 30, 2020 and June 30, 2019.

|                              | As of June 30 |          |       |        |  |  |  |  |

#### 3. Deposits and Investments (continued)

#### **Concentration of Credit Risk**

Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. The Trust did not hold any investments with a single issuer representing 5% or more of the Trust's fair value at June 30, 2020 or 2019.

Investment policy guidelines allow the security lending programs to hold up to 30% of the cash collateral reinvestment portfolio in U.S. Treasury bills, notes, and bonds.

#### **Interest Rate Risk**

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of fixed income instruments. The SBA, in compliance with Section 215.47, *Florida Statutes*, has adopted certain investment policies with regard to interest rate risk exposure for fixed income securities, which generally are managed through individual portfolios with various asset classes. The individual portfolios may have different policies regarding interest rate risk.

For the Short-Term Portfolio, the weighted-average maturity to final maturity date (WAL) is limited to 120 days and weighted-average time to coupon reset (WAM) is limited to 60 days. For securities without a fixed interest rate, the next coupon reset date is used as the maturity for the reset WAM calculation. No individual security shall have a final maturity date longer than 397 days except for U.S. Treasury and Agency securities, which shall not exceed five years.

The Mortgage Index Portfolio duration should be similar to the duration of the mortgage-related fixed income market and should remain within plus or minus 0.25 years of the Barclays Capital U.S. MBS Index duration. Swaps and/or Agency debentures may contribute no more than 25% of the portfolio's total duration.

The Intermediate Aggregate Less MBS Index Portfolio duration should remain within plus or minus 0.25 years of the Barclays Capital U.S. Intermediate Aggregate Bond Index duration less the MBS Index component. Interest rate swaps and interest rate futures, on a net basis, may contribute no more than 25% of the portfolio's total duration.

The Core Portfolio duration should remain within plus or minus 0.50 years of the Barclays Capital U.S. Intermediate Aggregate Bond Index duration. Interest rate swaps and interest rate futures may contribute no more than 25% of the portfolio's total duration.

#### 3. Deposits and Investments (continued)

The Core Portfolio contains certain investments known as collateralized mortgage obligations (CMOs). CMOs are often more sensitive to interest rate changes than other fixed income instruments. Examples of CMO securities that qualify as "highly interest rate sensitive" include interest-only (IOs), principal-only (POs), and inverse floaters (INVs). IO and PO securities are transactions that involve the separation of the interest and principal components of a security. They are highly sensitive to prepayments by mortgagors, which increase the value of a PO and decrease the value of an IO. Inverse floaters (INV) have an inverse relationship to a benchmark rate, and the coupon payment is adjusted as the interest rate changes. If the benchmark interest rate decreases, the coupon rate increases and vice versa, which allows the bondholder to benefit from declining interest rates. Similar to an IO, an interest-only inverse floater's value increases as interest rates rise.

For security lending portfolios, policy guidelines allow investment in the following:

- \* Tri-party qualified repurchase obligations, with a term to repurchase not to exceed forty-five calendar days, that are fully collateralized by U.S. Treasury bills, notes, bonds and/or strips, U.S. Government Agency securities, U.S. Government Agency mortgage-backed securities and U.S. Equity securities.
- \* Money market mutual funds regulated by SEC rule 2a-7.
- \* U.S. Treasury bills, notes and bonds maturing within 92 days or less.

Security lending investments that were purchased prior to the investment policy guidelines established in December 2008 are still held in the lending programs, and are slowly paying down. For investments that had floating interest rates, interest rate reset dates were used to calculate WAM.

# 3. Deposits and Investments (continued)

The interest rate risk tables for the Trust as of June 30, 2020 and 2019, are presented below. Investment types, related to fixed income portfolios, are presented using effective weighted duration. Investment types related to short-term, and security lending collateral portfolios are presented using weighted-average maturity.

| Investment Type         Effective (Duration)         Effective (Duration)         Effective (Duration)         Weighted (Duration)         Total (Duration)         Weighted (Duration)         Total (Duration)         Weighted (Duration)         Total (Duration)         (Duration      |  | As of June 30, 2020 |                |                |           |  |  |  |  |  |  |  |

<sup>&</sup>lt;sup>1</sup> Includes investments in IOs, POs and INVs totaling \$56 million.

<sup>&</sup>lt;sup>2</sup> The futures and swaps contracts' effective weighted durations were calculated using notional values (in U.S. dollars) rather than fair values.

#### 3. Deposits and Investments (continued)

#### **Foreign Currency Risk**

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of a deposit or investment. Under Section 215.47, *Florida Statutes*, and subject to the limitations and conditions of the State Constitution or of the trust agreement relating to a trust fund, moneys available for investment by the Trust may be invested in various types of securities denominated in foreign currency. The SBA has developed for the Trust an Investment Policy Statement (IPS) that sets ranges on investments by asset class. All asset classes may hold non-U.S. securities, depending on portfolio guidelines. For fiscal years 2020 and 2019, Florida law limits the exposure to foreign securities held outside of foreign group trusts and certain other foreign entities to 50% of the total Trust. There is no requirement that this exposure to foreign currency risk be hedged through forward currency contracts, although some managers are authorized to use forward currency contracts.

Commingled international equity funds are collective investments where the Trust owns a portion of the total units in commingled funds with other investors. Exchange-traded funds (ETFs) are investment funds, traded on the exchanges, that hold assets such as stocks or bonds, and the Trust owns a portion of the total shares in the ETFs. Participatory notes (P-Notes) allow the Trust to participate in certain foreign equity markets where direct participation is not possible due to local government regulations, tax policies, or for other reasons. The overall investments or notes themselves are denominated in U.S. dollars, but a portion of the underlying assets may be exposed to foreign currency risk in various currencies.

Alternative investments are commingled investment funds (primarily limited partnerships) where the Trust owns a portion of the overall investment in the funds. For those funds denominated in U.S. dollars, some of the underlying investments may be exposed to foreign currency risk in various currencies.

The Trust also holds positions in futures, options, swaps, and foreign currency contracts that are subject to foreign currency risk. Additional information on derivatives is provided in Note 3 to the financial statements.

# 3. Deposits and Investments (continued)

Following are the Trust's deposits and investments, by currency at fair value (in U.S. dollars) and by investment type, exposed to foreign currency risk as of June 30, 2020 and 2019.

|  | As of June 30, 2020 |    |            |               |          |    |           |                |    |            |  |  |  |

Currency options on a currency pair, that are denominated in U.S. dollars, are dependent on the exchange rate of the given foreign currency relative to the U.S. dollar.

#### **Forward and Spot Foreign Currency Contracts**

Foreign currency contracts are agreements to exchange one currency for another currency at an agreed-upon price and settlement date. Currently, there are two types of foreign currency contracts being utilized by the Trust. Spot currency contracts are valued at spot (traded) currency rates and are used primarily for trade settlement and currency repatriation. Forward currency contracts are valued at interpolated forward rates and may be used to mitigate currency risk for changes in value associated with foreign holdings, payables and/or receivables. Forward currency contracts are recorded as investment assets and liabilities on the statements of net position and spot currency contracts are recorded as receivables and payables on the statements of net position. In addition, a currency overlay program is used to seek additional value and is run independently of the underlying equity assets.

# 3. Deposits and Investments (continued)

#### **Security Lending**

During fiscal years 2020 and 2019, the Trust participated in security lending programs with two lending agents, including the Trust's custodian and one third-party agent. These security lending programs have indemnity clauses requiring the lending agent to assume the borrower's risk from default. There are no restrictions on the amount of securities that can be loaned at one time to one borrower.

#### 3. Deposits and Investments (continued)

In addition to the two agent lending programs, the Trust participated in security lending through investments in four commingled funds that do not offer borrower indemnification. The Trust receives a proportionate share of the security lending income generated from these activities.

Collateral requirements for securities on loan range from 100% to 105%, depending on the lending agent, the type of security lent, and the type of collateral received. As of June 30, 2020, the Trust had received and invested approximately \$1.8 billion in cash collateral and received \$13.6 billion in securities as collateral for the lending programs. The collateral held for the security lending transactions exceeded the fair value of the securities on loan (including accrued interest). As a result, none of the lending programs were under-collateralized at the end of the fiscal year. The Trust does not have the ability to pledge or sell the non-cash collateral securities unless the borrower defaults, so the non-cash portion is not reported on the statements of net position.

Maturities of investments made with cash collateral generally are not matched to maturities of the securities loaned, because security lending agreements generally are open-ended with no fixed expiration date. As such, investments made with cash collateral are limited to those with a final maturity of up to 92 days. However, investments in one of the security lending programs included investments with final maturities of six months or more, which represented approximately 4% of that lender's total collateral invested at June 30, 2020. This is due to the portfolio containing some legacy securities that will remain until they are sold or mature.

#### 3. Deposits and Investments (continued)

#### **Derivatives**

The Trust accounts for derivatives in accordance with GASB Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments* (GASB 53). This statement defines a derivative instrument as a financial instrument or other contract that has all of the following characteristics:

- a. Settlement factors. It has (1) one or more reference rates and (2) one or more notional amounts or payment provisions or both. Those terms determine the amount of the settlement or settlements, and in some cases, whether or not a settlement is required.
- b. Leverage. It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- c. Net settlement. Its terms require or permit net settlement, it can readily be settled net by a means outside the contract, or it provides for delivery of an asset that puts the recipient in a position not substantially different from net settlement.

Derivative instruments in the Trust as of June 30, 2020 and 2019, consisted of futures, options, forward currency contracts, and swaps.

The SBA has established investment guidelines for each investment portfolio. Pursuant to these guidelines, derivative investment instruments are authorized to be used as tools for managing risk or executing investment strategies more efficiently than could otherwise be done in cash markets, and may only be used as part of a prudent investment process. Various derivative investment instruments are used as part of the investment strategy to hedge against interest rate risk, currency risk in foreign markets, default risk, and mortgage-backed security prepayment risk, and to effectively manage exposure to domestic and international equities, bonds, and real estate markets.

A futures contract is an agreement between a buyer and a seller to exchange a particular good for a particular price at a particular date in the future, all of which are specified in a contract common to all members in a market on an organized futures exchange. Upon entering into a futures contract, collateral (cash and/or securities) is deposited with the counterparty, in SBA's name, in accordance with the initial margin requirements of the counterparty. Futures contracts are marked to market daily by the board of trade or exchange on which they are traded. The resulting gain/loss is received/paid the following day until the contract expires. The frequency of cash flows depends upon specified collateral and margin limits mutually agreed upon by the SBA and third-party counterparties. Futures contracts involve, to varying degrees, risk of loss in excess of the variation margin disclosed in the statements of net position. Losses may arise from future changes in the value of the underlying instrument.

#### 3. Deposits and Investments (continued)

An option gives the buyer a stipulated privilege of buying or selling a stated property, security, or commodity at a given price (strike price) within a specified time (for an American-style option, at any time prior to or on the expiration date). A securities option is a negotiable contract in which the seller (writer), for a certain sum of money called the option premium, gives the buyer the right to demand within a specified time the purchase (call) from or sale (put) to the option seller of a specified number of bonds, currency units, index units, or shares of stock, at a fixed price or rate, called the strike price.

A forward contract is a contractual obligation, typically over-the-counter, traded between two parties to exchange a particular good or instrument at a set price on a future date. The buyer of the forward agrees to pay the price and take delivery of the good or instrument and is said to be "long" the forward contract, while the seller of the forward, or "short," agrees to deliver the good or instrument at the agreed price on the agreed date.

A swap is a contractual agreement to exchange a stream of periodic payments utilizing a central clearing house whereby, each party in the transaction enters into a contract with the central counterparty. These agreements may be over-the-counter or exchange-traded. Upon entering into a swap contract through a clearing house, collateral is deposited with the counterparty, in SBA's name, in accordance with the initial margin requirements of the counterparty. Swaps are available in and between all active financial markets. Examples include:

Interest rate swap – An agreement between two parties, where one stream of future interest payments is exchanged for another based on a specified principal amount. Interest rate swaps often exchange a fixed payment for a floating payment that is linked to an interest rate.

Credit default swap – An agreement that allows one party to "buy" protection from another party for losses that might be incurred as a result of default by a specified reference credit (or credits). The "buyer" of protection pays a premium for the protection, and the "seller" of protection agrees to make a payment to compensate the buyer for losses incurred if a defined credit event occurs.

<sup>&</sup>lt;sup>1</sup> The total notional values of long and short fixed income futures positions were \$2.9 billion and \$533.9 million, respectively. The total notional value of long equity futures positions was \$1.4 billion.

#### **Commitments**

Each year the Trust enters into a number of agreements that commit the Trust, upon request, to make additional investment purchases (i.e. capital commitments) up to predetermined amounts over certain investment time periods. The unfunded capital commitments for private equity, real estate and strategic investments not reported on the Trust's statements of net position totaled \$13.5 billion and \$14.0 billion as of June 30, 2020 and 2019, respectively.

#### 4. Contingencies and Litigation

In the ordinary course of operations, the SBA, on behalf of the Trust, may be party to various claims, legal actions, and class action lawsuits. The SBA General Counsel's Office handles these matters either directly or with assistance of outside legal counsel. In the opinion of the SBA's management and legal counsel, these matters are not anticipated to have a material financial impact on the Trust.

#### 5. Related Parties

The Department of Management Services (DMS), the FRS Investment Plan Trust Fund and the SBA are considered related parties for the purpose of the Trust's financial statements. The Trust has a variety of transactions with the DMS, the FRS Investment Plan Trust Fund and the SBA. The DMS administers the Plan, including collecting employer and employee contributions, remitting those contributions to SBA for investment in the Trust, requesting withdrawals from the Trust for benefit payments, and then paying those benefit payments to members. The SBA administers the FRS Investment Plan Trust Fund, including working with DMS to collect employer and employee contributions and processing member-directed benefit amounts between the Trust and the FRS Investment Plan Trust Fund. The SBA provides investment services to the Trust and charges an investment service fee on the Trust's net asset value each month-end.

Significant transactions between the Trust, DMS, FRS Investment Plan Trust Fund and the SBA for fiscal years 2020 and 2019, were as follows:

# INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Board of Trustees
State Board of Administration of Florida

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the Florida Retirement System Trust Fund (the "Trust") administered by the State Board of Administration ("SBA") of Florida, as of and for the year ended June 30, 2020 and the related notes to the financial statements, and have issued our report thereon dated November 13, 2020. As discussed in Note 1, the financial statements present only the Trust and do not purport to, and do not, present fairly the financial position of the State of Florida, the SBA of Florida or the Florida Retirement System, their changes in financial position, or, where applicable, their cash flows in conformity with accounting principles generally accepted in the United States of America. As described in Notes 2 and 3, the financial statements include investments valued at approximately \$40.8 billion as of June 30, 2020, for which fair value has been estimated by general partners and investment advisors, and reviewed and approved by the Trust's management, in the absence of readily ascertainable market values. Because of the inherent uncertainty of valuation, the estimate of values may differ from the values that would have been used had a ready market existed for the investment securities, and the differences could be material. Our opinion is not modified with respect to these matters.

#### **Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the Trust's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control. Accordingly, we do not express an opinion on the effectiveness of the Trust's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Trust's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

#### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the Trust's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

#### **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Trust's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Trust's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
