Re: Corrected Page for RiskLink 15.0.1 (Build 1625) Submission

Dear Dr. Medders:

We have discovered an incorrect label (title) in Form A-8, Part B, Table 57, printed page 336. Attached is an underline/strikeout page showing the needed correction.

Nothing in the model software or any model output has changed and this does not seem to fit the criteria for any of Type I, Type II, or Type III errors as described in the ROA. The label/title of the table currently states that 2007 FHCF exposure data was used in the completion of the form. However, 2012 FHCF exposure data was used, as is required. The only change is correcting the label of the FHCF vintage used from 2007 to 2012.

As you are well aware, the submission documents are available to the public, which includes many of our clients. It is important that this document accurately reflects the information used in creating the forms.

We have not provided any additional documentation or certifications at this time, but are happy to do so if the Commission thinks it would be necessary or helpful.

Thank you for your consideration.

Sincerely,

Kay A Cleary
