June 4, 2021

Dr. Justin Brolley
CoreLogic, Inc.
555 12th Street, Suite 1100
Oakland, California 94607

Dear Dr. Brolley,

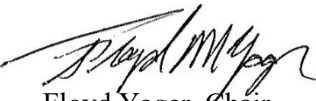

This will confirm the finding of the Florida Commission on Hurricane Loss Projection Methodology on June 2, 2021, that the CoreLogic, Inc. model has been determined acceptable for projecting hurricane loss costs and hurricane probable maximum loss levels for residential rate filings. The determination of acceptability expires on November 1, 2023.

The Commission has determined that the CoreLogic Florida Hurricane Model 2021a on Risk Quantification and Engineering v21 (*primary platform*), limited to the options selected in the input form and reported in the output form provided in Standard A-1, Hurricane Modeling Input Data and Output Reports, Disclosures 4 and 5:

- (1) complies with the hurricane standards adopted by the Commission on October 29, 2019, and
- (2) is sufficiently accurate and reliable for projecting hurricane loss costs and probable maximum loss levels for residential property in Florida.

On behalf of the Commission, I congratulate you and your colleagues. We appreciate your participation and input in this process.

Sincerely,

Floyd Yager, Chair
