Re: AIR Hurricane Model for the United States Version 17.0.1 as Implemented in Touchstone 7.0.7

Dear Mr. Yager,

AIR has released a software update, Touchstone 7.0.7, to clients. Touchstone 7.0.7 contains the same AIR Hurricane Model for the United States (the U.S. Hurricane Model) which was submitted to the Florida Commission on Hurricane Loss Projection Methodology (Commission) and found acceptable under the 2017 Standards on June 11, 2019. Touchstone 7.0.7 contains software updates described below.

AIR would like to submit the AIR Hurricane Model for the United States Version 17.0.1 as Implemented in Touchstone 7.0.7 under Report of Activities, Section VI.G as an Interim Software Update.

Updates to Model Components

There were no changes made to the AIR U.S. Hurricane Model.

Updates to Software Components

Touchstone 7.0.7 contains an update to a specific output file format used exclusively for exporting aggregated analysis results that get used in pricing of reinsurance treaties. The output file format is compatible only with AIR's aggregate loss analytics software, which is a separate platform from Touchstone. These exported files are not used in insurers' ratemaking.

No other changes have been made within this version of Touchstone. This update does not impact the AIR U.S. Hurricane Model, Florida loss costs or PMLs.

In accordance with the 2017 Report of Activities, Section VI.G, we have prepared the following forms with results from the currently acceptable version, 6.1.0 and the updated version, 7.0.7, as well as a percentage change that demonstrates no change for the Commission's review:

- Form A-1 (Zero Deductible Personal Residential Loss Costs by ZIP Code)
- Form A-4B (Output Ranges)
- Form A-8B (Probable Maximum Loss for Florida)
- Form S-5 (Average Annual Zero Deductible Statewide Loss Costs – Historical versus Modeled)
- Form V-2 (Hurricane Mitigation Measures and Secondary Characteristics, Range of Changes in Damage)

Page 2

AIR would like to submit and request the review of Touchstone 7.0.7 under the Report of Activities, Section VI.G., for consideration of an interim software update. We ask that the Commission confirm that the AIR Hurricane Model for the United States v17.0.1 as Implemented in Touchstone 7.0.7 is considered acceptable under the 2017 standards.

Best regards,

Brandie Andrews, CEEM
Vice President, Regulatory and Rating Agency Client Services
